

AT A GLANCE:

- The DARI Motion system provides the Lake Nona Performance Club with a unique ability to rapidly assess the biomechanical needs of a large group of individuals.
- The DARI system is the world's only FDA-cleared, markerless Human Motion Assessment (HMA) solution.
- The results of these analysis will provide invaluable insight into the weaknesses and vulnerabilities as well as strengths an individual possesses.
- The effective application of this system allows for increases in performance and reduction of injuries.
- Athleticism report allows for identification of critical areas of improvement for athletic development.
- Specific programs for Quarterbacks and Pitchers provide an in depth biomechanical analysis for each pitch. This identifies joint angle deficits and overall strengths and individual weaknesses for each athlete.
